2009-2010 CATALOGUE

Wellington is pleased to announce that our 2009-2010 catalogue has been printed and is ready to be distributed to our customers. This catalogue contains the many new products that were announced by Wellington Reporter over the past few years as well as the diverse selection of products in the 2006/2007 catalogue.

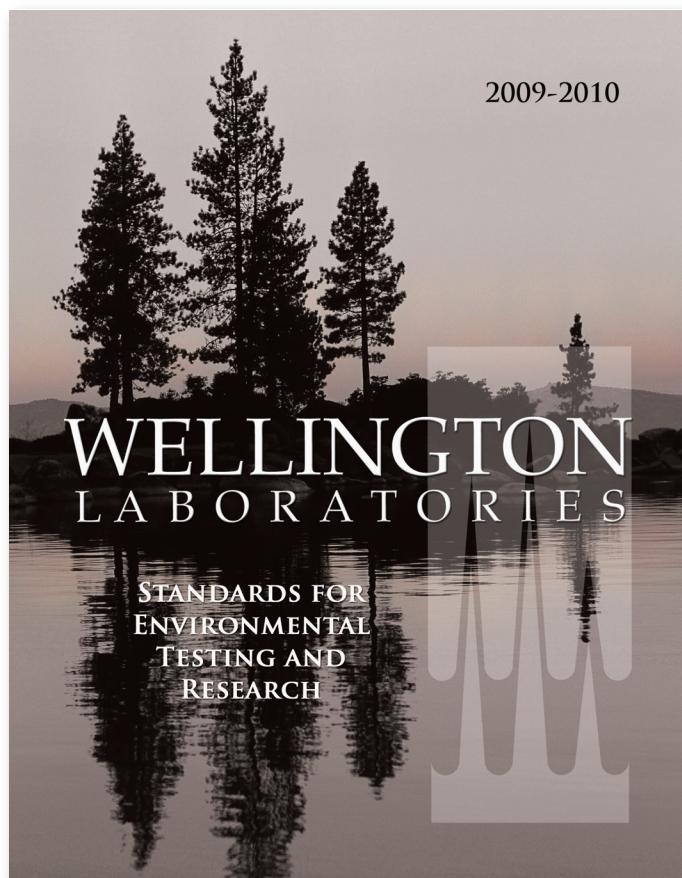

As a result of customer requests and escalating environmental concern, we have added over **100 NEW PRODUCTS** since the last printing of our catalogue including **5 NEW** mass-labelled PCDD standards.

We have supplemented our inventory of Brominated Flame Retardants with **32 NEW** products such as previously unavailable PBDE congeners and mixtures as well as many emerging brominated contaminants.

We have also increased our selection of Perfluoroalkyl Compounds by adding **45 NEW** products to the catalogue such as mass-labelled PFCAs and PFASs as well as many native compounds.

We would also like to take this opportunity to introduce the following products:

Dutch 7 PCBs (native and mass-labelled);
PCB-CVS-H (and support solutions);
4PC-BDE-208; and
Chlorinated Derivatives of TCS and MeTCS

ISO 9001
